## Counterfeit Detector

### **CASSIDA: InstaCheck (Counterfeit Detector)**

The Cassida InstaCheck incorporates the most powerful counterfeit detection technology available to the industry, giving you peace of mind and confidence in your cash handling needs. This detector verifies infrared security marks, the most reliable anti-counterfeit protection available for paper currency. With its advanced sensors, it also verifies magnetic marks.

The InstaCheck immediately indicates whether the money you've taken is legitimate currency. Verifying the authenticity of currency is easy - simply pass a bill through the detector. A green light signals good currency; a red light and beep tell you the bill is suspect.

**If a bill is valid:** The green "PASS" indicator will light up, a confirming beep will sound and the bill will be returned.

**If a bill is suspicious:** the red "FAIL" indicator light will flash, three warning beeps will sound and the bill will be returned.

#### **Features:**

- Verify currency instantly
- Immediate Pass or Fail Indication
- Multi detection for Accuracy (IR Infrared and MG Magnetic)
- Works with all U.S. denominations
- A must have for every cash-handling situation
- Includes: DC Power Converter with AC power cord, User Manual and Window Sticker

#### **Specifications:**
