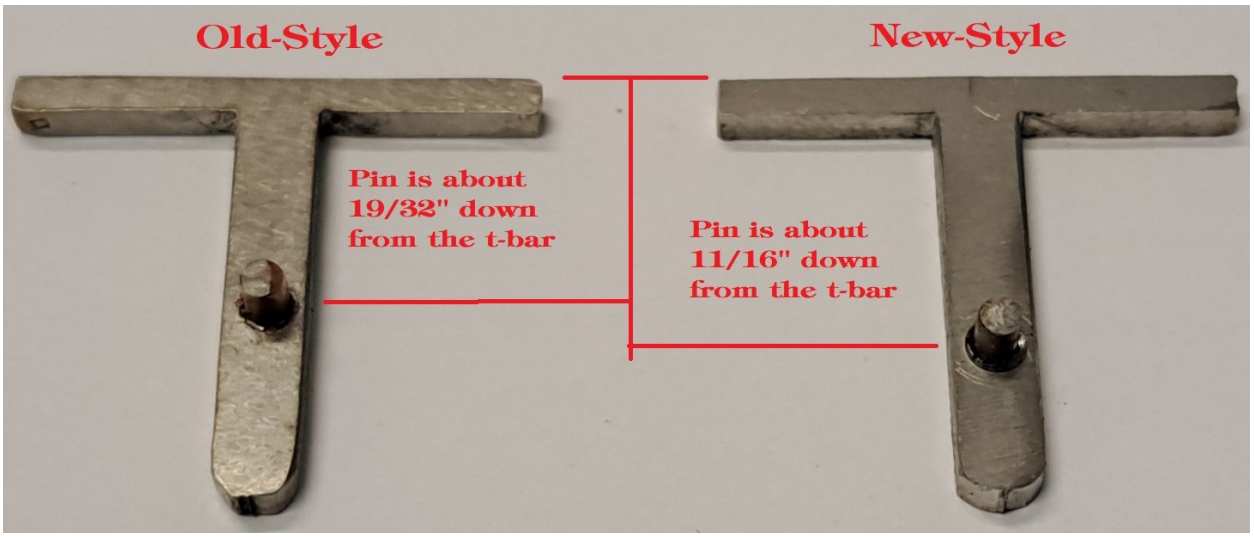
Guide Rail Identification

If you order a brand new Coin Gauge Assembly, you need to make sure you have the correct Guide Rail Assembly to match. Older Guide Rails will not work with the newer Coin Gauges.

As well, if you are ordering a new Guide Rail Assembly, you need to make sure you are ordering the correct one for your existing Coin Gauge.

Older Guide Rails have the Pin located approximately 19/32” along the base of the T, as measured from the Crossbar.

Newer Guide Rails have the Pin located approximately 11/16” along the base of the T, as measured from the Crossbar.


Thank you,
KLOPP International, Inc.
